

FIRECLAY BRICK GN-42

Classification:	General Purpose Super Duty Firebrick	
Typical Chemical Analysis:	Al ₂ O ₃	45%
	SiO ₂	50%
	Fe ₂ O ₃	1.7%
Refractoriness:	1760°C min.	
Bulk Density:	2.2g/cm ³	
Apparent Porosity:	16% max.	
Cold Crushing Strength:	49MPa min.	
Refractoriness Under Load: 0.2MPa °C ≥	1430	
Linear Change After Reheating:	1450°C x 2h 0 - 0.3%	
Standard Size	230 x 115 x 75mm	

A full range of fire clay and high alumina fire bricks in various shapes and sizes is available on request.
